

MELINDA IVANOV

(425) 614 - 5541, Bothell, WA
jns.melinda@gmail.com
[linkedin.com/in/melinda-ivanov](https://www.linkedin.com/in/melinda-ivanov)

Skilled **software engineer** and accessibility/UX advocate with a strong background in designing, developing and optimizing applications for inclusivity and ease of use. Professional experience includes working with **C++, C#, .Net, WinUI, WinRT** as a **Software Engineer** at **Microsoft**. Capable of balancing multiple projects and deliverables with creativity and precision and adapting to changing requirements and eager to iterate on new ideas. Excellent team player who enjoys helping out coworkers in software engineering and other disciplines in order to accomplish and exceed common goals.

SKILLS

Languages: **C#, C++, XAML, JavaScript, Java, SQL, HTML5, CSS3**

Tools and Technologies: **WinUI, WinRT, Windows Desktop development, AI, RAG, Event-based programming, Windows App SDK, .Net, React, ORM, VS Code, Visual Studio, OOP, OCR, Express.js, jQuery, Node.js, MySQL, MongoDB, GraphQL, Gradle, Maven, Docker, Linux, Tomcat, Bootstrap, JSP, IntelliJ IDEA, Git, GitHub, REST**

EXPERIENCE

SOFTWARE ENGINEER 2022 - Present, Microsoft

- Working on the flagship AI features/applications for Microsoft Copilot+ AI PCs. Played a key role in all aspects of application and UX development from architecture, prototyping to final product.
- Technologies: WinUI3, WinRT, C++, C#, XAML, .Net, Windows Desktop development, Event-based programming, Windows App SDK, AI, RAG, GraphQL, OCR
- Participated in hackathons to prototype new ideas and volunteering in groups to improve company culture
- Microsoft Patent Award (2x)

SOFTWARE ENGINEER 2022, Microsoft

- Developing user-applications for future versions of Windows by providing convenient and fast lookup functionalities. Utilizing Optical Character Recognition, Machine Learning and REST based web services
- Project included architecting REST based web-services, creating design documents, exploring and prototyping Machine Learning options and implementing the most feasible ideas in C#

SENIOR LEARNING ASSISTANT/TUTOR 2021 - 2022, Trilogy Education Services

- Full-Stack Web Development Tutor supporting students enrolled in University Bootcamps across the globe
- Using front-end languages and technologies such as HTML5, CSS3, JavaScript, jQuery, Responsive Design, Bootstrap, Handlebars, React
- Working with databases, server-side languages and technologies like MongoDB, MySQL, Node.js, Express.js, ORMs, MERN-Stack, RESTful APIs

SOFTWARE ENGINEER 2021, 8BillionMinds

- Full-Stack Software Engineer working on a live, face-to-face knowledge sharing platform
- Engaged in all phases of the software development lifecycle, including: participating in design/architecture, researching and implementing improved functionality
- Enhancing system performance and availability
- Finding and fixing security issues

PUBLIC PROJECTS

DISASTER DASHBOARD: This is a full-stack web development project utilizing the MERN Stack. This app is built to collect recent disasters: near Earth events, COVID-19 Statistics, Silver and Gold exchange rates, and a survival kit checklist. Contributions include building out the disaster events and the checklist with a server side API utilizing JavaScript, React,

Node.js, Express.js, HTML5, CSS3, Git, GitHub, Heroku, MySQL, MVC, Okta

Source: https://github.com/jnsmelinda/Disaster_Dashboard

GOOGLE BOOK SEARCH: This interactive app allows the users to search for books and save them to a reading-list or view them on Google Books. When the book has been read, it can be deleted from the reading-list. JavaScript, React, Node.js, Express.js, HTML5, CSS3, Git, GitHub, Heroku, MongoDB, Google Books API

Source: <https://github.com/jnsmelinda/Google-Book-Search>

VENT: This project helps concerned citizens to see the air quality in their area and to provide a platform where they are able to express their feelings alongside a short message to their local representative regarding the air quality.

Responsibilities include building out the server-side stack and data management utilizing JavaScript, Node.js, Express.js, Handlebars.js, HTML5, CSS3, Git, GitHub, Heroku, MySQL, Sequelize, jQuery, third-party APIs

Source: <https://github.com/jnsmelinda/Vent>

Other projects can be found at: jnsmelinda.github.io/projects.html

EDUCATION

Full-Stack Web Development 2020 - University of Washington, intensive program

focused on gaining technical programming skills in JavaScript, jQuery, Node.js, React, Express.js, HTML5, CSS3, MySQL, MongoDB, Git, GitHub, GitLab, Heroku, RESTful APIs, Responsive Design, OOP, MERN stack

EARTH SCIENTIST MSC 2015 Geology major, 4.00 GPA, **University of Szeged**, Hungary - Academic studies in Statistics, Advanced mathematics, 2D/3D Modeling and Simulation, Geospatial data analysis, Geophysics, Technical Geology, GeoInformatics

EARTH SCIENTIST BSC 2013 Geology major, **University of Szeged**, Hungary - Academic studies in Mapping, Mathematics, GIS, GeoInformatics, Data collection and calculations, Materials Science

ADDITIONAL EXPERIENCE

KEY HOLDER 2017 - 2018, The Body Shop, Bellevue WA

- Successfully designing and implementing daily strategic sales plans
- Top performer at customer satisfaction and client management
- Coach of team members to ensure best team performance, resulting in 10% revenue

SALES ASSOCIATE 2016 - 2017, Bath & Body Works, Bellevue WA

- Passionate team player building strong customer relationships
- Constantly exceeding personal sales goals by 30%

ADDITIONAL INFORMATION

- Authorized to work in the US (US citizen)
- Full working proficiency in English
- Native proficiency in Hungarian
